

Features and Benefits

- Quad Switched Hall Plate / Chopper Stabilized Amplifier
- Ratiometric Output for A/D Interface
- Low Quiescent Voltage Thermal Drift
- Small Plastic Packages (TSOT, 4-SIP-VA, TO-92)
- RoHS compliant TSOT package

Applications

- Linear Position Sensing
- Rotary Position Sensing
- Current Sensing

TSOT	V_{DD}	Out	V_{SS}		Positive
UA	V_{DD}	V _{SS}	Out		Negative
VA	V_{DD}	n/c	V _{SS}	Out	Positive

2. Description

The MLX90242 is a CMOS Linear Hall Effect sensor IC. It possesses active error correction circuitry which virtually eliminates the offset errors normally associated with analog Hall Effect devices.

The ratiometric output voltage is proportional to the supply voltage. When using the supply voltage as a reference for an A/D converter, fluctuations of $\pm 10\%$ in supply voltage will not affect accuracy. For a positive slope, the voltage at the output will increase as a South magnetic field is applied to the branded face of the MLX90242. Conversely, the voltage output will decrease in the presence of a North magnetic field. For a negative slope, the voltage at the output will increase as a North magnetic field is applied to the branded face of the MLX90242. Conversely, the voltage output will decrease in the presence of a South magnetic field.

3. Glossary of Terms

- Gauss, Tesla: Two units to quantify a magnetic flux density. Conversion: 1 mT = 10 Gauss
- Voq: Quiescent output voltage. Output voltage for B = 0.

4. Absolute Maximum Ratings

Supply Voltage (Over Voltage), V _{DD}	7.0 V			
Output Current Short to Vdd	5 mA			
Output Current Short to Vss	0.5 mA			
Output Pin Short to Vss Pin	Infinite			
Output Over Voltage	8 V			
Operating Temperature Range, T _A	-40°C to 150°C			
Storage Temperature Range, T _S	-55°C to 150°C			
Maximun Junction Temp, TJ	170°C			
Magnetic Flux Density	Infinite			

Exceeding the absolute maximum ratings may cause permanent damage. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

5. MLX90242 Electrical Specifications

DC Operating Parameters. L: T_A = -40 to 150°C, E: T_A = -40 to 85°C V_{DD} = 5.0V (Unless otherwise specified)

Parameter	Symbol	Test Conditions	Min	Тур	Max	Units	
Supply Voltage	V _{DD}	Operating	4.5	5.0	5.5	V	
Supply Current	I _{DD}	B = 0, V _{DD} = 5V, I _{OUT} = 0	1.8	2.5	4.5	mA	
Output Current	Гоит	$V_{DD} = 5V$ Pull-up = 5 k Ω , Pull-down = 50 k Ω	-1.0	-	0.1	mA	
Quiescent Output Voltage	Voq	B = 0, TA = 25°C	2.4	2.5	2.6	V	
Output Voltage	VoH	V _{DD} = 5V, I _{OUT} = -1.0 mA	4.75			V	
Output Voltage	VoL	V _{DD} = 5V, I _{OUT} = 0.1 mA			0.25	V	
Response Time	tr	Vdd=5V,Vout from Voq to V _{OH} /V _{OL} without load		400	800	μS	
Noise (RMS)				5	10	mV	
Output Resistance	R _{OUT}			20		Ω	
Linearity Error	Le				0.5	%Vdd	

6. MLX90242 Magnetic Specifications

L: T_A = -40 to 150°C, E: T_A = -40 to 85°C V_{DD} = 5.0V (Unless otherwise specified)

Parameter	Symbol	MLX90242LUA-CC03			MLX90242LVA-CC03			MLX90242ESE-BC03			MLX90242ESE-CC03

⁽¹⁾ B = 0, TA = -40 to $150^{\circ}C$

(2) For TSOT package, TC of Sensitivity and Thermal Voq Drift are not fully tested and therefore cannot be specified. Characterization and statistic data can be provided by Melexis upon request.

7. Applications Information

C1 and C2 values can be trimmed to satisfied EMC requirements according to the environment (PCB, connectors,...).

The output rise time is affected for large capacitor C2, depending of the couple R1;C2.

8. Installation Comments

- 1.) Avoid mechanical stress on leads or package.
 - Stress may cause Voq shift.
 - A.) Avoid bending leads at the package interface.
 - B.) Support the leads by clamping, when bending.
 - C.) Avoid gluing device to another material.

This may cause temperature-related stress.

- 2.) CMOS products are static sensitive devices, please observe ESD precautions.
- 3.) Observe temperature limits during soldering

9. Standard information regarding manufacturability of Melexis products with different soldering processes

Our products are classified and qualified regarding soldering technology, solderability and moisture sensitivity level according to following test methods:

Reflow Soldering SMD's (Surface Mount Devices)

- IPC/JEDEC J-STD-020
 Moisture/Reflow Sensitivity Classification for Nonhermetic Solid State Surface Mount Devices (classification reflow profiles according to table 5-2)
- EIA/JEDEC JESD22-A113
 Preconditioning of Nonhermetic Surface Mount Devices Prior to Reliability Testing (reflow profiles according to table 2)

Wave Soldering SMD's (Surface Mount Devices) and THD's (Through Hole Devices)

- EN60749-20
 Resistance of plastic- encapsulated SMD's to combined effect of moisture and soldering heat
- EIA/JEDEC JESD22-B106 and EN60749-15
 Resistance to soldering temperature for through-hole mounted devices

Iron Soldering THD's (Through Hole Devices)

EN60749-15
 Resistance to soldering temperature for through-hole mounted devices

Solderability SMD's (Surface Mount Devices) and THD's (Through Hole Devices)

 EIA/JEDEC JESD22-B102 and EN60749-21 Solderability

For all soldering technologies deviating from above mentioned standard conditions (regarding peak temperature, temperature gradient, temperature profile etc) additional classification and qualification tests have to be agreed upon with Melexis.

The application of Wave Soldering for SMD's is allowed only after consulting Melexis regarding assurance of adhesive strength between device and board.

Melexis is contributing to global environmental conservation by promoting **lead free** solutions. For more information on qualifications of **RoHS** compliant products (RoHS = European directive on the Restriction Of the use of certain Hazardous Substances) please visit the quality page on our website: http://www.melexis.com/quality.asp

10. ESD Precautions

Electronic semiconductor products are sensitive to Electro Static Discharge (ESD). Always observe Electro Static Discharge control procedures whenever handling semiconductor products.

11. Package Information

11.1. UA Package

11.2. TSOT Package (RoHS compliant)

Notes:

- 1. All dimensions are in millimeters
- 2. Outermost plastic extreme width does not include mold flash or protrusions. Mold flash and protrusions shall not exceed 0.15mm per side.
- 3. Outermost plastic extreme length does not include mold flash or protrusions. Mold flash and protrusions shall not exceed 0.25mm per side.
- 4. The lead width dimension does not include dambar protrusion. Allowable dambar protrusion shall be 0.07mm total in excess of the lead width dimension at maximum material condition.
- 5. Dimension is the length of terminal for soldering to a substrate.
- 6. Dimension on SECTION B-B' are apply to the flat section of the lead between 0.08mm and 0.15mm from the lead tip.
- 7. Formed lead shall be planar with respect to one another with 0.076mm at seating plane.

Top Side Marking:

12. Disclaimer

Devices sold by Melexis are covered by the warranty and patent indemnification provisions appearing in its Term of Sale. Melexis makes no warranty, express, statutory, implied, or by description regarding the information set forth herein or regarding the freedom of the described devices from patent infringement. Melexis reserves the right to change specifications and prices at any time and without notice. Therefore, prior to designing this product into a system, it is necessary to check with Melexis for current information. This product is intended for use in normal commercial applications. Applications requiring extended temperature range, unusual environmental requirements, or high reliability applications, such as military, medical life-support or life-sustaining equipment are specifically not recommended without additional processing by Melexis for each application.

The information furnished by Melexis is believed to be correct and accurate. However, Melexis shall not be liable to recipient or any third party for any damages, including but not limited to personal injury, property damage, loss of profits, loss of use, interrupt of business or indirect, special incidental or consequential damages, of any kind, in connection with or arising out of the furnishing, performance or use of the technical data herein. No obligation or liability to recipient or any third party shall arise or flow out of Melexis' rendering of technical or other services.
